Research Profile

M.Sc. candidate researching inference-time intervention and mechanistic interpretability for large language models and multimodal agents. First author of papers at PAKDD 2026 INTERSPEECH 2026, and AACL 2026 . My work develops training-free methods for identifying and controlling internal representations, including sparse-autoencoder-based routing and causal localization of attention heads. I am particularly interested in extending these approaches to graph-enhanced LLMs, graph-based memory and retrieval, and multimodal graph-language reasoning.

Education

M.Sc. in Informatics — Nagoya University 2025–2027 (expected)

Department of Intelligent Systems, Graduate School of Informatics, Nagoya, Japan

Advisor: Prof. Ichiro Ide

B.A. in Tourism Management — Huaqiao University 2019–2023

Quanzhou, China

GPA: 4.54/5.00 | Ranked 1st in the Department of Tourism Management

Research Experience

Research Assistant — Nagoya University 2025–present

WISE Program: Transdisciplinary Mobility Innovation (TMI)

- Investigate inference-time representation learning for frozen LLMs and multimodal agents; translate research hypotheses into reproducible interventions, controlled experiments, ablations, and multi-metric evaluations.

Master's Publications

Emotion Is Not External Knowledge: Internal Attention Signals for Affective State Reasoning

First author AACL 2026

- Proposed training-free Self-targeted Internal Attention Boosting (SIAB) to causally localize and strengthen affective heads; improved prompt-matched baselines by up to +10.3 macro-F1 on ECC and GoEmotions.

Facet-Level Persona Control by Trait-Activated Routing with Contrastive SAE

First author / *DOI* / *arXiv* PAKDD 2026

- Developed interpretable, facet-level persona control with contrastive sparse autoencoders and context-dependent routing; evaluated on a balanced, leakage-controlled 15,000-sample corpus.

DeSRPA: Decoupled Speech Role-Playing Agent via Inference-Time Intervention

First author / *Paper* / *Demo* INTERSPEECH 2026

- Connected frozen Qwen3-4B and StyleTTS2 through separate cognitive and acoustic controls; evaluated controllable generation, speaker similarity, WER, latency, and human judgments.

Bachelor's Publications

Tourism Studies (in Chinese)

[1] Chunfa Chen, **Wenqiu Tang**, Lisi Yao, Yiran Wang. *A Study on the Deep Motivation of College Student Tourism Volunteers.* Tourism Overview, no. 11, pp. 18–21, 2022. [CNKI].

Technical Skills

Programming and ML: Python, PyTorch, Hugging Face Transformers; transformer architectures, sparse autoencoders, contrastive learning, representation engineering, activation steering.

Data and evaluation: Controlled dataset construction, data leakage prevention, automatic and human evaluation, multi-metric benchmarking, reproducible research pipelines.

Multimodal systems: Qwen3-4B, StyleTTS2, emotion2vec, WavLM, controllable speech generation, cross-model representation integration.

Honors and Languages

National Scholarship, Ministry of Education, China 2019–2020

First-Class Scholarship for Outstanding Overseas Exchange Students, Huaqiao University 2021–2022

First-Class Scholarship, Huaqiao University 2022–2023

Outstanding Graduate, Huaqiao University Sep. 2023

WISE Program (TMI) Fellowship, Nagoya University (MEXT-funded) 2025–present

Excellent Presentation Award, DBWS Sep. 11, 2025

Languages: Chinese (native); Japanese (JLPT N2 120/180 N1 109/180); English (TOEFL iBT 103/120, 2022).
